ORACLE TRANSPORTATION CLOUD.

READY FOR TAKE OFF.

Oracle Software with PROMATIS Solutions

Award-winning Oracle transport process management software combined with reliable PROMATIS Best Practice solutions, project management processes, process models, templates, and services.

From the pioneer of the process-oriented introduction of Oracle enterprise software solutions: the Kickstart for integrated processes within the supply chain management.

Why the Transportation Cloud?

The well-balanced industry solution offers a high-performance tool for managing all transport activities within the global supply chain.

The combination of user-friendliness and industry-specific functions enables a reduction in costs while at the same time optimizing service quality and automating the processes for an efficient and transparent logistics operation.

Kickstart for process innovation!!

With the Kickstart offerings for the Oracle Applications Cloud, PROMATIS enables a smart entry into the use of application software services: fast, economical, low-risk. For a fixed price!
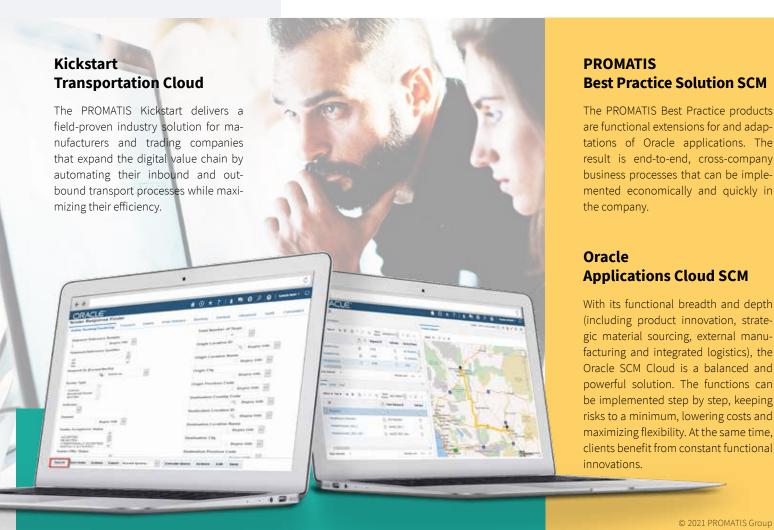

A pre-configured Oracle SaaS product suite with best practice business process models and proven PROMATIS implementation and training services.

Kickstart
Transportation Cloud

The PROMATIS Kickstart delivers a field-proven industry solution for manufacturers and trading companies that expand the digital value chain by automating their inbound and outbound transport processes while maximizing their efficiency.

PROMATIS
Best Practice Solution SCM

The PROMATIS Best Practice products are functional extensions for and adaptations of Oracle applications. The result is end-to-end, cross-company business processes that can be implemented economically and quickly in the company.

Oracle
Applications Cloud SCM

With its functional breadth and depth (including product innovation, strategic material sourcing, external manufacturing and integrated logistics), the Oracle SCM Cloud is a balanced and powerful solution. The functions can be implemented step by step, keeping risks to a minimum, lowering costs and maximizing flexibility. At the same time, clients benefit from constant functional innovations.
