650+ customers in  
15+ industries

## Sustainability at PROMATIS

As part of the Corporate Sustainability Reporting Directive (CSRD), we develop intelligent sustainability reporting solutions together with our clients.

The aim is to analyze sustainability issues in environmental, social and governance (ESG), make set targets transparent, and measure and report on target achievement.

### Oracle ESG Reporting and Planning Solution enables:

- Modeling and aligning sustainability initiatives throughout the company
- Importing data from source systems, converting raw data into ESG/CSRD metrics
- Planning and coordinating various ESG initiatives
- Visualization of performance with dashboards and AI-driven alerts
- Reports to internal and external stakeholders
- Green House Gas (GHG) Protocol as the core
- Complete ESG template “Carbon Calculator” and KPIs
- Most-used Frameworks CSRD, GRI, SSAB, IFRS etc.
