

ORACLE WAREHOUSE MANAGEMENT CLOUD. READY FOR THE FUTURE.

Oracle Software with PROMATIS solutions

Award-winning Oracle Warehouse Management software combined with reliable PROMATIS Best Practice solutions, project management processes, procedure models, templates and services.

From the pioneer of process-oriented implementation of Oracle enterprise software solutions – the kickstart for integrated processes within supply chain management.

Why Warehouse Management Cloud?

Oracle Warehouse Management Cloud is a stand-alone system solution that can be seamlessly integrated into the existing system architecture. The stable and highly configurable solution allows for the implementation of all warehouse management functions and thus leads to significantly lower operating costs and more efficient process flows. Equip your company for the future with a first-class cloud-based and individually scalable warehouse management solution.

Kickstart to process innovation!

With the Kickstart offers for the Oracle Applications Cloud, PROMATIS ensures a smart entry into the use of application software services: fast, economically efficient, low-risk. At a fixed price!

A pre-configured Oracle SaaS product package with Best Practice business process models and proven PROMATIS implementation and training services.

Kickstart Warehouse Management Cloud

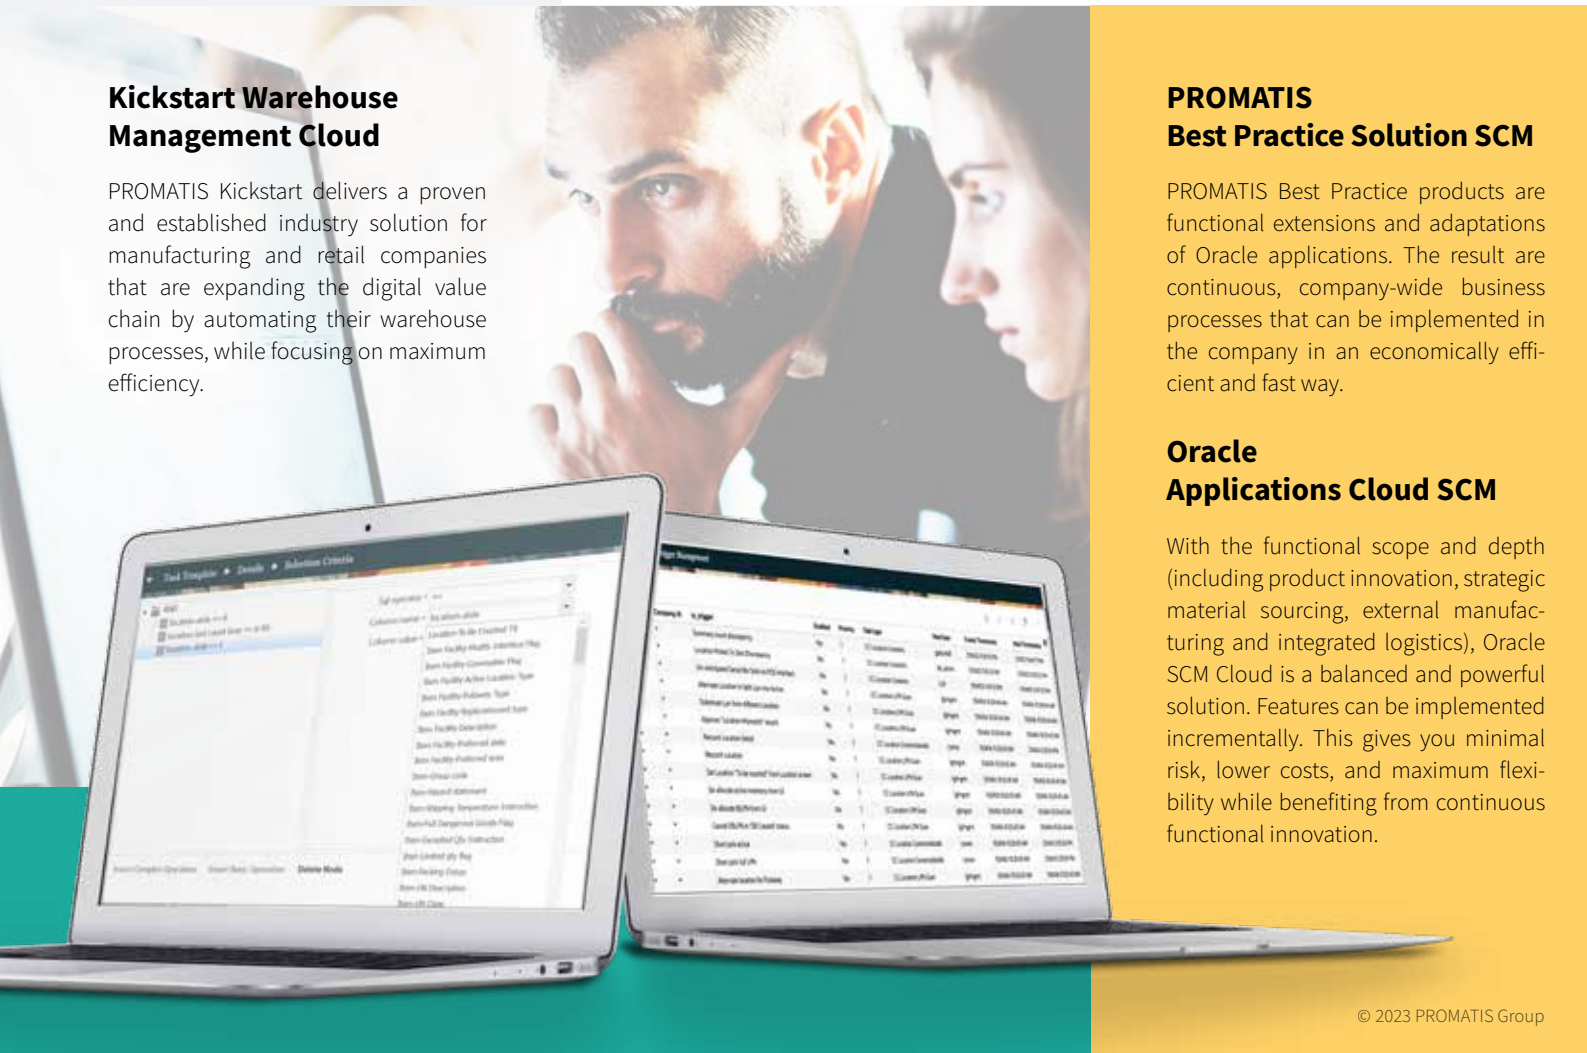

PROMATIS Kickstart delivers a proven and established industry solution for manufacturing and retail companies that are expanding the digital value chain by automating their warehouse processes, while focusing on maximum efficiency.

PROMATIS Best Practice Solution SCM

PROMATIS Best Practice products are functional extensions and adaptations of Oracle applications. The result are continuous, company-wide business processes that can be implemented in the company in an economically efficient and fast way.

Oracle Applications Cloud SCM

With the functional scope and depth (including product innovation, strategic material sourcing, external manufacturing and integrated logistics), Oracle SCM Cloud is a balanced and powerful solution. Features can be implemented incrementally. This gives you minimal risk, lower costs, and maximum flexibility while benefiting from continuous functional innovation.
