

ORACLE INNOVATION CLOUD. READY FOR TAKE OFF.

Oracle Software with PROMATIS Solutions

Award-winning Oracle innovation management software combined with reliable PROMATIS Best Practice solutions, project management processes, process models, templates, and services.

From the pioneer of the process-oriented implementation of Oracle enterprise software solutions: The Kickstart for the development and management of innovation processes!

Why the Innovation Cloud?

Support for the complete innovation lifecycle – from idea generation through requirements management and concept development to planning a future-oriented product portfolio.

Included: Social Innovation involving the entire innovation community. The result: faster decisions and traceability.

Kickstart for process innovation!

With the Kickstart offerings for the Oracle Applications Cloud, PROMATIS enables a smart and efficient entry into the use of application software services: Fast, economical, and low-risk – at a fixed price!

A preconfigured Oracle SaaS product suite with best practice business process models and proven PROMATIS implementation and training services.

Kickstart Innovation Cloud

The PROMATIS Kickstart is the ideal solution for IT-supported innovation processes – at a fixed price. Your benefit: Sustainable support for anchoring the entire innovation lifecycle within your company – from the initial idea to the final product.

PPROMATIS Best Practice Solution SCM

PROMATIS Best Practice products are functional extensions and adaptations of Oracle applications. The result is end-to-end, cross-company business processes that can be implemented efficiently and cost-effectively.

Oracle Applications Cloud SCM

With its functional breadth and depth (including product innovation, strategic material sourcing, external manufacturing and integrated logistics), the Oracle SCM Cloud is a balanced and powerful solution. The functions can be implemented step by step, keeping risks to a minimum, lowering costs and maximizing flexibility. At the same time, clients benefit from constant functional innovations.
